TRIBUTE TO

UMAYAL AACHI

Interview
with
Dr.J S N Murthy

PUBLISHED BY : KARAUKUDI ALAGAPPA GROUP OF EDUCATIONAL INSTITUTIONS

Dear Readers,

Being well known that our Alagappa Waves is completely the product of students admitted to the Karaikudi Alagappa Group of Institutions, we are happy to announce that we have successfully completed all the quarterly periodicals of this year. We people believe that creativity transforms lives, and that those transformed people can make a difference in their societies and in the world by working for tolerance, understanding, justice, equality and compassion. Living and learning in a diverse community allows us to recognize our common humanity and promotes practical understanding. We believe that traditional Indian ideals, values and faith are a solid foundation for life and that among other things these ideals and values encourage a sense of responsibility for ourselves - for one another, and for the world. Here, we are presenting a Fourth edition focusing on different Turner and we dedicate this issue to our most admirable Umayal Aachi wholeheartedly!! We wish to travel with you for a long while Aachi. Keep supporting and enjoy reading!!!

Warm thanks & Regards

Waves team

Coodinating heads

PRIYADHARSHINI C

Hey there! This is Priya, I'm currently doing my third year. Travel, food, and photography is my cup of tea and ofcourse, I love graphics designing and that's why I'm here. Furthermore, I always listen to my heart.

MEGALAI V

Hello readers, I'm Megha, and I am pursuing 3rd year in B.A English at Dr. URCW. I have a strong bond with my college which helps to module my career. I'm a Multitasker in Alagappa Waves. I believe that life is nothing but full of "Learning" which I imply in my life.

NASRIN BARGANA BV

Hello, my dear big cheese readers...I'm your lovable Nasrin Bargana, the friendly honcho of Alagappa Waves. I am a second-year English student in a proud URCW. I am the type of person who has the desire to taste each and every single drop of life.

School Coordinators

PRIYANGA M

Hi. this is Priya. I'm doing 9th std in Alagappa Girls Matriculation Higher Secondary school. I am so grateful to be part of the Wares team.

HEMANTH AYYARO

Hi, this is Hemanth. I am doing 11th std in Alagappa Matriculation Higher Secondary School. I'm so cheerful and proud to be part of Alagappa Waves.

POOJIKASRI V

Hi. this is Poojika. I am doing 10th std in Dr. Alagappa Academy Senior Secondary School, I'm happy and proud to be part of Alagappa Waves.

We are extremely proud to share that September 11th our respected chairman Dr. Ramanathan Vairavan along with Mrs. Alagu Vairavan and Ms. Devi Alamelu Vairavan, Managing Trustee met with the Hon'ble Vice President of India Shri Venkaiah Naidu at Chennai.

அழகப்பா கல்வி நிறுவனங்களின் குழு

To the Lighthouse

“Minds are conquered not by Arms, but by love and magnanimity!” says a Critic. These fit truly in every syllable to our Secretary Emeritus, **Dr. Umayal Aachi**. She’s one among ; who has been ‘born great ’; to the Legend Vallal Alagappa Chettiar.

“*The Child is the Father of the Man*”, says Wordsworth and Dr. Umayal Aachi proved her prodigy at an early age by donating her jewels to her father’s philanthropic mission as Vallal Chettiar donated his house.

Being brought up in the realms of Chettinad, Aachi who took up her father as her role model,, has always been thinking about uplifting the womenfolk of her region.

She has pioneered in building a Women’s College in Chettinad, which proudly bears her name, Dr. Umayal Ramanathan College for Women, in the heart of Karaikudi, motivating and enhancing thousands of girl children every academic year.

She has also been instrumental in bringing Alagappa University and various other Academic institutions like Schools – Nursery and Primary, Matric, CBSE and Day care for toddlers. The most striking is the recent Nursing College to realize partially her father’s dream of instituting a Medical College in Karaikudi!!

“ *A Thing of beauty is a joy forever!* “
“*Her Compassion would be there forever* “!!!

ASTOUNDING SOUL!

Dr. umayal Ramanathan, the great legend daughter of Alagappa Chettiar became the Secretary of the Alagappa Educational Trust following the footsteps of her father in 1957. This was the incredible role played by her. She had the privilege of meeting with the Prime Minister and Chief Minister. She was instrumental in founding Alagappa University in 1985 fulfilling the dream of her father. She was honoured for her inner beauty in more aspects. She had a passion for extravagance and grandeur.

Her marriage was eye-catching, the dowry spread over many halls ranged from household items to engraved rosewood furniture from imported cutlery to gold ornaments studded with diamonds and other valuable gems. She has been a syndicate member of Coimbatore Agricultural University and a senate member of the Madurai Kamaraj University.

Currently she is the Managing Trustee of the Alagappa Charitable Trust and the Ashoka Charitable Trust. Her concern for the society is evident in the various posts that she had held. She was the member of the social welfare board oh Ramnad district and the Chairperson of Gangadeeswarar Temple. People fondly recollect her giving away in charity to the poor and partaking in the inter-caste meals programme. Following the footsteps of her father, she founded many educational institutions. Her service to the cause of education and society was duly given recognition when she was accorded the Doctor of Letters degree by the honorable Governor Dr.Chenna Reddy.

The prestigious Indra Priyadharshini award was conferred on her as a fitting tribute to her achievements. No doubt she is even today a 'Priyadharshini' not only to her children but also to all who are acquainted with her.

THANK YOU TO OUR FRONT LINE AND ESSENTIAL WORKERS!

OUR NATIONS GUIDING LIGHT

Hi everyone! I'm Priya . I'm writing this article to thank all the real heroes of this country. As we all know, during this pandemic the government had announced lock down to keep the spreading of corona virus in control .To be honest I was at cloud nine when I heard of the news that schools and colleges are closed. Because during those times of quarantine I had the chance to spend time with my father, who is "As busy as a bee" and of course my mom felt the same way as I did. But besides all these, I always from the bottom of my heart had concern and even worried about the front line workers...yes because, while we are feeling safe in our homes with our family they have come forward selflessly and courageously to serve for the society. Isn't it astonishing? I can't express my admiration and gratitude in words! I cannot even imagine world without them. I wonder how even in those stalemate times they can put themselves in the way of danger to serve for the nation. This is what it means to be a real hero, they build a beautiful legacy. "Thank you for being our nation's guiding light in the face of this Adversity".

#LETSRESPECTTHEM

ISSUES FACED DURING ONLINE CLASSES

PARENTS.TEACHERS.STUDENTS

ISSUES FACED BY PARENTS DURING PAMDEMIC.

Due to Covid-19 teaching has gone online. Almost all schools across the globe are closed. Online education takes place over the internet as e-learning. Schools provide education to students in the comfort of their homes and also help in controlling virus spread. Another positive effect of online education is students have become more tech-savvy. They got to know more about various apps and programs. But there are some drawbacks of online education. There is no face-to-face conversation between teachers and students. This puts a barrier in communication skills and personality development.

Internet connectivity is also a big issue in some areas. Internet prices are also increasing and everyone cannot afford online education. Online education provides freedom to students which are not good for them as it lacks discipline. In online education, everything is scripted. It lacks emotions like laughter, excitement, or anger. Thus, there are both advantages and disadvantages of online education but in this lock down time, this is truly helpful in providing continuous and uninterrupted learning.

First time students like my daughter B. Kavi Nitharthini really misses school campus environment, play grounds, teachers, staff, and new friends. Wholesomely she misses out a new world, a second home.

Hope she gets all those excitement very soon.

Stay Healthy. Stay Safe.

ISSUES FACED BY TEACHERS DURING ONLINE CLASS

Understanding teachers' and students' perceptions of online teaching and learning has been an important and popular research topic. During the COVID-19 pandemic, students at all levels (college, secondary school, and elementary school) were unable to attend school. To maintain student learning, most schools have adopted online teaching. Therefore, the purpose of this study was to explore the design of online teaching activities and online teaching processes adopted by teachers at all levels during the pandemic. The whole class were video and audio discussion only. School teachers were more likely to use homemade videos and share their screens for teaching and to arrange a large variety of teaching interactions. Internet based distance teaching has become a global trend, software, hardware and educational training have been evolving. Education systems worldwide break their brains to find alternatives to face-to-face instruction.

As a result, online teaching and learning have been used by teachers and students on an unprecedented scale. Since parents and teachers play a fundamental role in supporting students to develop these crucial attitudes. We have to consider the alternative of no schooling, online schooling has been an important tool to sustain skills development during school closures.

Students' attitudes and dispositions are influenced to a great degree by the support they receive from families and teachers and by the role models they are exposed to. Education systems should aim to strengthen engagement between schools and parents in order to improve information and guidance to parents on effective practices for supporting their children's learning. At the same time, teachers need support to incorporate technology effectively into their teaching practices and methods and help students overcome some of the difficulties that are associated with this form of learning environment. We have to overcome these kind of situation and prepare the student's mindset for online classes and also we pray the god to change the situation to our normal life.

STUDENTS ONLINE CLASS EXPERIENCE

I am VN.Harini, studying X STD in Alagappa Academy CBSE school, Karaikudi . In covid pandemic days the classes were in the online mode. From the covid days online classes are going and no regular classes . But I like to attend online class because all my teachers are teaching very nicely , But I wish to come to school and study because we can interact with everyone face to face .That is only the problem in the online mode, otherwise I like the online mode very much. English,Tamil and all the subjects are easy in the online class except the Maths class. Maths class cannot be understood online because it is difficult to do sums and workout the problems. But my Maths mam is teaching well in the online class . In my school I like the online mode teaching because my other school friends are saying that, their online classes are not conducted properly.

The class starts from 9.00AM to 2.10PM. There are totally six periods. All the teachers teach very nice and the next day they would ask some questions about yesterday's class and then only they continue the next class which is very useful to recall the topic taught yesterday. And then, at the completion of every lesson oral test is conducted daily. Everyday evening students are given home works which should be sent to teacher via google classroom

The advantage is that the option to record the lesson and review it later is a tremendous benefit with online classes. Once the teachers teach the lessons we can listen again later on as well.. The problem is that to copy the notes in the classwork note. Some times the eyes will pain while copying in the notebook. A good solution to this would be to give the students some break from the screen to refresh their mind and their body. Not even the best online class can fully replace the teacher teaching on- campus. Therefore traditional classes shouldn't be replaced with online teaching learning.

INTERVIEW WITH DR. JSN MURTHY

_VICE CHANCELLOR OF RAMACHANDRA
UNIVERSITY

18.09.2021

INTERVIEWED BY THE CO -ORDINATING HEADS

1. What is the main factor that contributed to your success both as a physician and Vice Chancellor?

Patience....patience means a lot. It is the only thing which will lead a simple man to the peak. It is the most needed quality to a man. One should not be apt to the saying, what little patience that everyone had was waning fast.

2. How do you handle the situation in case of complications?

We have to be proactive than react. In all the case of troubles we have to be silent and we should not become panic and shiver. We must have the confidence on us to overcome the situation.

3. How do you stay up-to-date with the new treatments and advancement in cardiology?

As being the cardiologist one should be updated and I am updating me by learning from my juniors and students and I won't hesitate to learn that.

4. What exactly is cardiovascular disease and how can we prevent it?

CVD is the general term for conditions affecting the heart or blood vessels and there is a increased level of blood clots. We can prevent it from controlling our blood pressure, cholesterol and triglyceride levels, eat healthy diet, limit alcohol and exercise regularly.

5. What is the first aid treatment given to the cardiac arrest patient?

Have the person sit down, rest and try to keep calm. Loosen any tight clothing, ask if the person takes any chest pain medicines, such as nitroglycerine for a known heart condition and help then take it. Chew and swallow an aspirin while waiting for emergency help.

6. What dietary changes can we make to reduce our heart disease?

Most importantly we have to maintain ideal balance. We have to be aware of good cholesterol, bad cholesterol and fats that are required to our body. We can balance by burning calories through physical activities.

7. Has being a VC for reputed institutions made any changes in your life?

Being a VC, everybody will aspire. It is a great feel; we have many responsibilities as they have accepted as I have leadership quality to take the whole university into the proper way. Here we have many associated responsibilities as we are dealing with educated faculties to put all their life into teaching. I should guide them and see whether they are getting the benefits of teachings. It makes me feel proud.

8. Can you share your work experience?

Being a VC is not easy nowadays because there are many regulators and the aim of all these regulators are very clear. I should maintain all the things happening under the university physically. I should get the feedback and correct the drawbacks, inside the campus. I should maintain collaboration with other universities and maintain at least 3.5/5 ranking nationally. I should make the chain so that I can say that I am standing on the shoulders of all.

9. How was your experience in abroad and what makes you come back to your mother country?

You have to go and see the world outside, we have to learn more there than what we learn from here. We can get rid of scare, and when we go there the level of confidence changes completely because only then we know who we are. I can give the best example that is a great man your chairman Ramanathan Vairavan, WHO HE IS? He is a man from Karaikudi, who went abroad and again he is serving his motherland now. He is the first person who works on myoglobin kit. He is globally competitive and locally relevant. So that, we should never forget our motherland and serve with care.

10. How do you like to introduce yourself being a physician or being a VC?

Ultimately, I love being a physician. VC is just an add on responsibility but I am connected to my stethoscope than anything else. Being a physician I can go anywhere and go for camps and I can serve the whole nation.

11. Mention a mindset and strategy required for this roll.

When being a physician we have to play a very important role that is committed to our patients. When being a VC we are the administrator. As a VC to deal with senior most professor and deans so I don't do micro managements, all that is needed is allocating the responsibilities, But in the first case I have to be on the field and I can manage every micro things.

12. How do you define a best university?

Today the smallest land space university can be the top university and vice versa. Mostly the private universities are occupying the top status as they are pouring more effects, time and competing with the government; because the funds have not set properly, salaries have not set properly. A good university can be defined, which spends more time on safety faculties providing good infrastructure and we have to maintain good circle with students. One should maintain good rank in NAAC as it is transparent all over the world. One university should provide recognition to the students and teachers without any politics.

13. How do you believe is the best way of motivating your faculty members?

We can motivate our faculty members by setting an example; provide more workshops with neighbor institutions. We have provided the best compliments for their success.

14. What is your advice for the younger generation?

Most importantly they should maintain patience and perseverance both in personal and works. Not all can achieve the peak overnight, one should keep calm and wait for the right time, keep on working on it. Don't oscillate by dumping others ideas and kindly don't waste time, make use of each and every seconds. We have to pour all our effects into valuable things.

KNOW YOUR VACCINE

COVAXIN

- Inactivated Virus .
- 2 Shot vaccine
(2nd Dose after 28 Days)
- Efficacy of 70-80%
- Developed by India
- Available in India
- Approved by 9 Countries

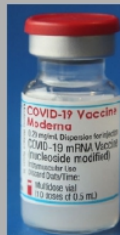

SPUTNIK V

- Viral Vector(Modified Adenovirus)
- 2 Shot vaccine
(2nd Dose after 28 Days)
- Efficacy of 85-95%
- Developed by Russia
- Available in India

MODERNA

- mRNA Based. Made from Nucleoside modified mRNA
- 2 Shot vaccine
(2nd Dose after 28 Days)
- Efficacy of 90-94%
- Developed by US
- Not Available in India as of now
- Approved by Majority Countries

NOVAVAX (Covovax)

- Subunit Vaccine
- 2 Shot Vaccine
(2nd Dose after 21 days)
- Efficacy of 74-94%
- Developed by UK, Spain, India
- Available in India
- Approved by Majority Countries

JHONSON & JHONSON

- Viral Vector(Human Adeno)
- 1 Shot vaccine
- Efficacy of 70-85%
- Developed by US- BELGIUM
- Not Available in India as of now

PFIZER & BIOTECH

- mRNA Based. Made from Nucleoside modified mRNA
- 2 Shot vaccine
(2nd Dose after 21 Days)
- Efficacy of 90-94%
- Developed by US- Pfizer/ GERMANY - Bio-NTech
- Not Available in India as of now
- Approved by Majority Countries

ASTRAZENECA (COVISHIELD)

- Viral Vector
(Modern Chimpanzee Adeno)
- 2 Shot vaccine
(2nd Dose after 84 Days)
- Efficacy of 70-90%
(After 1 st dose 70%-and after 2 nd Dose 90%)
- Developed by UK, SWEDEN INDIA
- Available in India
- Approved by 130+

CORONAVAC

- Inactivated virus
- 2 Shot Vaccine
(2 to 4 weeks between Doses)
- Efficacy of 74-98%
- Developed by China
- Available in India
- Approved by 55 Countries

POWER OF SOCIAL MEDIA

11

#pathurubaikkumelakudukkavendam

SAVED MITHRA!

On June 14th, the volunteers had messaged the CEO of Care and Welfare Mr. SindhuRaam who has the intention to help a kid, Mithra about the fund raising to buy a medicine costs about 16 crores by posting a medical request through his social media pages so that the willing donors and followers can help Mithra. Initially he had a lot of queries about SMA but after doing some research on it he finally he decided to help Mithra. It is a genetic disorder - the absence of a gene which is responsible to give signal for the functions of our body parts. This deficiency is known as SMA (Spinal Muscular Atrophy), the medicine which cures this type of disease will cost 2.125 million US\$; in India it is approximates to 16 crores. It is made by US only and there is no rate card in India. If you want to use this medicine it should be injected before the child reaches it's age of 2, if there is a single day crosses after the age of 2 they won't give medicine, as their UK's procedure. In spite of this procedure there are no restrictions in India. Mithra's father wanted to inject this medicine to his child to prevent death. Finally he took the project on June 17th. They heard an information that Mithra's second birthday is arriving on the date of July 7th. There is only 15 days left. Is it possible? They started this project on 1st June. And so many celebrities donated; yet they needed more money.

WHO IS MITHRA?

I'm Mithra, a 2 year old kid. My father name is Satheesh and mother name is Priyadharshini. I suffered from SMA. Thanks for everyone who shared and donated for the camp.

We need to check is there any child suffering from SMA like Mithra, because it is a rare syndrome there is one child suffering among 10,000 or 6000 children. This is the project of "Save Mithra". "Many of them told me that 16crore is a big amount. How do you collect it? And is it possible? Most of the people insulted me at first; they told me I cannot do it". But he [Mithra's father] was strong in his decision and decided to precede it further. People think that billionaire, millionaire and some rich peoples will donate their needs and we can't afford it. There are so many people like them.

They decided to reach those people and want to create awareness about SMA genetic disorder. There are nearly 1 1/2 crores people who think like this. So we decided to collect ₹10 only per men and women under the campaign (patthuroobaikkumelayaarumkudukkavendam), Mithra's parents already collected 1 crore and they had decided to collect balance 15 crores. Many of them left us by thinking this project as scam, so only the mission took to complete after 5 days of target date; they don't need to blame those people. This is their strategy.

They told Mithra's father that in 1st of July they had to collect enough money but we couldn't. On July 11 we collected all the needs for the medicine and finally injected her on August 7th. They requested central government to remove the import tax, because the medicine alone will cost 16 crores but the import tax should be 35% that means 6 crore. Central government already removed the tax to import medicine in India; as we have requested to government to remove tax, by sending petition through mail on online website by 93221 volunteers.

Mr. Sindhu Raam

CEO OF CARE & WELFARE FOUNDATION

Finally central government accepted to remove the whole tax or else we need to collect 16 crore + 6 crore = 22 crore again. It is impossible to collect 16 crore in just 5 days without social media. It helped them to reach 1 1/2 people in social media normally 1.2 million views will reach for tik-tok video, YouTube video, songs and so many things, so only they decided to spread their news (fund to Mithra) to social media users. They have already sent the power of social media by issues related to 'Jallikattu' on 2017. They trusted social media more than people, finally SindhuRaam said that "this is our power, this is our field and finally it is impossible to raise funds without social media."

COOL SCIENTIFIC INNOVATIONS

1.

CRISPR-Cas 9 Technology into human life:

The CRISPR-Cas 9 was recognized for nobel prize in chemistry in 2020. In 2020, CRISPR-Cas 9 technology was first applied in humans for modifying the gene causing blindness.

2.

Smart tooth brush:

A new gadget called the uni-co smart brush will help you to brush your teeth as quickly as possible. The smart brush is basically a mouth guard that's packed with rotating electric tooth brush heads. It cleans your teeth in three seconds and all you have to do is place it in your mouth.

3.

Bike Light:

A new gadget called Bike sphere is here to help. This technology system creates a double ring of red lasers on the ground around a bike when a car gets too close. Drivers can see a cyclist more clearly.

4.

Light -up helmet:

It's the world's first smart helmet called the Lu mos, this helmet has white lights in the front and red lights in the back, so cyclists can be seen in the dark. All of the lights are controlled by a small remote that's attached to the handle bars.

5

Immunotherapy for human brain cancer : Canine Bone Cancer treatment to human trials:

The successful treatment of bone cancer in dogs using immunotherapy mediated researchers to conduct study trials in human brain cancer. The dog's immune response was boosted with their own white blood cells retrieved and grown in the lab. Since humans and dogs share a similar immune system, a parallel therapeutic approach can be applied to human cancers, according to the researchers.

SHARE MARKET

Merits of share market

- The shares listed in the market are either equity shares or preference shares convertible to equity shares. These shares allow the shareholders to have an ownership stake in the issuer company. Membership of stock exchange markets and resultantly trading used to be an exclusive activity. Only the brokers and sub-brokers are engaged in market transactions, however with the introduction of exchanges and particularly online trading it has become. Quite open to the general public.

Demerits of share market

- The share market is extremely volatile as there are numerous factors affecting the value of shares like government policies, budget, sectoral events, company disclosure, change in management of the company etc. In addition to this, the market is also susceptible to rolling effect, i.e. when a famous investor like Ketan Parekh or RakeshJhunjunwala, invests or disinvests from a company the effect is manifold and smaller.

What is share market?

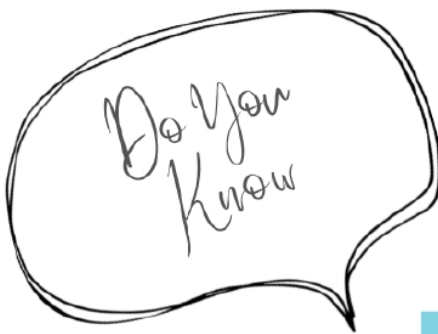

A share market is where shares are either issued or traded in. A stock market is similar to a share market. The key difference is that a stock market helps you trade financial instruments like bonds, mutual funds, derivatives as well as shares of companies. A share market only allows trading of shares.

How will share market be developed in future?

I think by the time 2050 NIFTY 50 can cross 1 lakh benchmark easily. Our trading volume increases by more than 20 times as of now and domestic participation will increase and a big deal of people will be shifting from real estate investments to stock market investments. Plus by that time people will be more financially literate and they would all be investing around 30% of their yearly income in stock market. NSE can become the No. 1 stock market in India by 2050 getting ahead of us stock.

A Crypto-currency is a binary data designed to work as a medium of exchange wherein individual coin ownership records are stored in a ledger existing in a form of a computerized data base using strong cryptography to secure transaction records, to create the creation of additional coins.
